

NOTICE OF HERBICIDE

Date: Jul 2, 2018

Dear Property Owner:

Public Service Electric and Gas Company (PSE&G) maintains easement rights on your property @ the block/lot listed above. The electric transmission lines on this right-of-way are essential for PSE&G to meet its commitment to provide safe, adequate and reliable electric utility service to consumers throughout New Jersey. Maintaining proper tree clearance from the power lines is absolutely necessary to assure:

- The continued safety of homeowners living near the transmission power lines,
- The safety of PSE&G employees and contractors working on the power lines, and
- The reliability of the electric utility system.

The overgrown vegetation on the PSE&G Right-of-Way, now requires maintenance of the right-of-way. As such, Davey Tree Expert Co, a private contractor working for PSE&G, will apply a herbicide application to brush and woody vegetation on PSE&G's Right of Way/Easement.

This work will begin, weather permitting, on or about Jul

If you have any questions or concerns, please telephone, Don Stair, Davey Tree Expert Co at 814-207-7103. Otherwise, please print and sign your name below and mail back with the enclosed, pre-paid postage stamped envelope as soon as you have an opportunity.

Thank you for your understanding,

Don Stair
