**TRENTON WATER WORKS
PUBLIC NOTICE TO CUSTOMERS
ANNUAL FIRE HYDRANT INSPECTION & FLUSHING
April - May, 2018**

Starting in April, 2018, Trenton Water Works (TWW) will be conducting Fire Hydrant Inspection and Flushing throughout its water distribution system.

New Jersey Department of Protection (DEP) regulations require water systems to conduct inspection and unidirectional flushing of fire hydrants every year during the spring season.

During this process, there could be occurrences of discolored water and low pressure. If you experience discolored water, open the faucets on the lowest floor of the property and run the water until it is clear. Usually it clears within 30 minutes. We strongly recommend that customers refrain from doing laundry and using the water for drinking or cooking while the water is discolored. Discolored or cloudy water is potable, but not desirable to use. If the discoloration persists, please call TWW Customer Service at 609-989-3055/3222.

Discolored water could occur at any time during the flushing period noted above, but more likely when we flush in your area. We will be distributing flyers to area residents the day before the scheduled fire hydrant inspection & flushing.
